

AGISAI INC

Capability Statement / Systems & Intelligence

BROOKLYN, NEW YORK / SMALL BUSINESS / FOUNDED 2018

COMPANY OVERVIEW

Founder-led custom software and systems integration for transportation, logistics, and mission-focused defense R&D. Agisai connects the platforms operators already run and pursues AI, autonomy, and power/edge hardware development.

CORE COMPETENCIES

Custom application development / Systems integration / Monitoring & data systems
Dispatch & fleet software / Logistics & warehouse software / AI integration
Asset tracking & inventory / Technical program management

SOFTWARE & DEVELOPMENT PROGRAMS

PORT: dispatch and fleet management software — Built.
FreshTrack: warehouse quality control and driver accountability — Built.
Asset Manager: asset tracking and inventory — In development.
I-MEPDIS and The Hub: power distribution and edge command R&D focus areas.
Hardware manufacturing, readiness, partnerships, and delivery scope require direct confirmation. Built software is not a claim of federal awards or customer deployments.

R&D & ENGAGEMENT PATHWAYS

Pursuing SBIR/STTR R&D, DIU prototypes, CSO/OTA opportunities, and subcontracting.
Bid channels: DoW SBIR, DIU, NSF, DHS, DOE, and USDA SBIR.
Eligibility and registrations depend on the specific solicitation. No contract vehicle or award is implied.
